## AMENDMENTS TO THE CLAIMS

2

 (Currently Amended) A personal information storage device comprising: information storage means for storing personal information and electronic money information:

short-distance communication means for making short-distance communications in a noncontact manner;

pair relationship establishment means <u>for receiving</u> that receives a pair relationship establishment request signal from a mobile terminal by said short-distance communication means and <u>transmits</u> <u>transmitting</u> personal identification information to said mobile terminal by said short-distance communication means; and

information providing control means <u>for receiving</u> that receives electronic money information from a financial institution terminal by said short-distance communication means <u>to be deposited with electronic money</u> and <u>transmits transmitting</u> said electronic money information by said short-distance communication means to a mobile terminal with which said pair relationship has been established <u>to make the mobile terminal pay</u> with the electronic money.

- 2. (Original) The personal information storage device according to Claim 1, wherein said information providing control means receives an electronic money increase request signal of a predetermined designated amount of money from said mobile terminal by said short-distance communication means and transmits an electronic money increase signal of said designated amount of money to a mobile terminal by said short-distance communication means.
- 3. (Original) The personal information storage device according to Claim 1 or 2, wherein said personal information storage device is integrated with something that a user wears.
- (Currently Amended) A mobile terminal comprising: short-distance communication means for making short-distance communications in a noncontact manner;

IJ

pair registration means <u>for transmitting</u> that transmits a pair relationship establishment request signal to a personal information storage device by said short-distance communication means, <u>receives receiving</u> personal identification information from said personal information storage device by said short-distance communication means, and <u>registers registering</u> said personal information storage device as having a pair relationship;

Docket No.: 80552(302741)

user setting means for setting and storing personal information including electronic money information by receiving it by said short-distance communication means from said personal information storage device registered as having the pair relationship; and

use permission means for transmitting that transmits a use permission request signal to a personal information storage device set as having the pair relationship by said short-distance communication means, receives receiving a use permission signal from said personal information storage device by said short-distance communication means, and makes making this mobile terminal available to pay with electronic money.

- 5. (Currently Amended) The mobile terminal according to Claim 4, further comprising electronic money increase means <u>for designating that designates</u> a predetermined amount of money and transmits an electronic money increase request signal by said short-distance communication means to a personal information storage device set as having a pair relationship, and <u>receives receiving</u> an electronic money increase signal of said designated amount of money from said personal information storage device by said short-distance communication means and stores it.
- 6. (Original) The mobile terminal according to Claim 4 or 5, wherein said pair registration means transmits a pair relationship establishment request signal addressed to an arbitrary personal information storage device, and said use permission means transmits a use permission request signal addressed to a specific personal information storage device.
